

## Project : Drag and drop Link Diagram UI

### Overview

A drag and drop UI for process management system

### Tech-Stack

1. **Backend:** NodeJS, ExpressJS
2. **Frontend:** ReactJS
3. **DB:** MongoDB

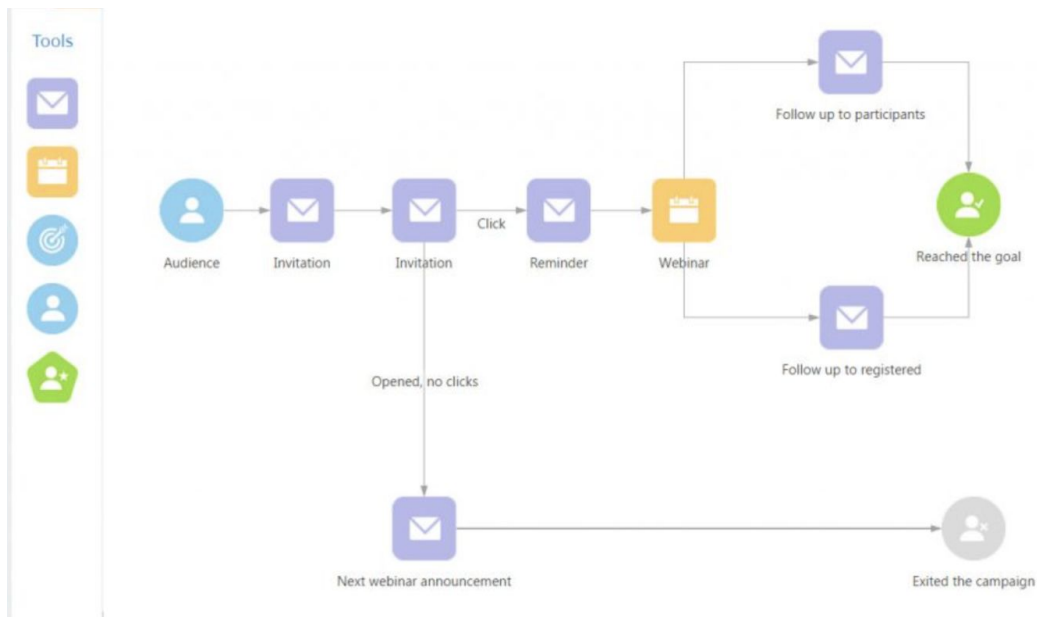

Image 1 : Example of UI

## Scenario

### 1. Available pages sidebar

Dashboard app for admins with available pages ready to drag and drop (tools in image1).

### 2. Add new page

The admin is able to add new pages:

- Title
- Icon
- Color
- Form
- Link (slug)

### 3. Drag and drop a task

The admin is able to start a process by dragging a task from the right sidebar

### 4. Arrows direction between tasks

The admin is able to link pages with arrows : the result of linking two pages is showing a link from the start page to the end page

A -> B : this example means that a link button will be in page A and redirect the user to page B.

### 5. Modal to edit page details

The modal shows:

- Title
- Icon
- Color
- Form

### 6. Track Views

Additional to the process the system should be able to track the page views.
