Summary

Hi there, I am Ahmed a System Administrator and a Developer with excellent communication skills and passion to progress within the IT industry. I Like solving problems and making solutions, what may seem like a small software or package for me, can solve a huge issue for someone else. That's why I created this page, to introduce myself and my humble contiributions to the open source community. I am currently a full time Freelancer, you can hire me for everything Keycloak/Odoo/Linux related. If you're a fellow student of knowledge, please feel free to comment or contribute to my projects.
